How and when to access the ATAR
By Laurene Collier

What is the ATAR?
The ATAR is the Australian Tertiary Admissions Rank, which measures a student’s overall performance in their VCE studies. It is designed to assist tertiary institutions when making course selections.

The ATAR is created by VTAC, using the Study Scores from a student’s successful completion of the VCE (Victorian Certificate of Education) and is administered and tested by the VCAA (Victorian Curriculum Assessment Authority).

Students who complete the satisfactory requirements for the VCE will receive a Study Score for each study they complete. VTAC applies a process of scaling to each Study Score, in order to convert it into an ATAR.

Students who have satisfied the requirements for the VCE and have study scores in one of (English, EAL, English Language and Literature) and at least three other studies (in a permissible combination) are eligible to receive an ATAR.

When can I find out my ATAR?
ATAR results are released on Monday 16 December 2013 at 7am (AEDST).

You can receive your ATAR results in three ways:

1. Register for SMS notification. You can opt to receive an SMS on the morning that results are released. Instructions are on VTAC’s webpage.
2. Log on to the Results and ATAR website after 7am on the morning results are released.
3. Wait for your results to arrive in the mail on Tuesday 17 or Wednesday 18 December. Please note that only VTAC applicants who have paid all processing fees will receive a statement in the mail.

If you access your results online, you will need your VCE student number and VTAC PIN.

Post Results and ATAR Service
If you have questions about receiving your results and ATAR, there will be a telephone and email service available from 7am to 5pm Monday 16 December and 9am to 5pm Tuesday 17 and Wednesday 18 December.

Any questions you have should be directed to 1800 653 080 (free call) or 03 9032 1717, or by email to pras@edumail.vic.edu.au.

You can also join the conversation on VTAC’s Facebook page or Twitter account or on the VCE Results and ATAR Blog.
I’ve found out my ATAR: what are my options?
By Laurene Collier

Now that results have been released, you may have questions about what your options are from here.

First thing’s first: don’t panic. If you haven’t received the ATAR you expected, there are other ways to get into the course you always wanted to do.

Many institutions offer alternative pathways in study programs.

If you have a subject that interests you or a preferred course or institution you wish to attend, you can call the institution and chat with a Pathways Counsellor about your options.

Pathway programs are designed to be another entry into tertiary study; you can enter from various points and exit when you have achieved your desired goal.

A list of Pathways Counsellors can be found on VTAC’s Facebook page.

Talk to your school careers counsellor.

They may be able to provide you with some ideas or suggestions that you haven’t thought about. Your careers teacher will be able to offer you some guidance.

You may decide to change direction.

You may choose to take a different route altogether, by taking a gap year to travel, work or explore other options. You can then choose to apply for further study at a later date as a Non Year 12 Applicant.

The most important thing is not to give up on something you are truly passionate about; there are always other options available to you.
Should I change my preferences?
By Laurene Collier

Change of Preference
With the release of VCE results and ATAR, all VCE students now have the opportunity to reconsider their course preferences.

The change of preference period allows time for students to consider their options, based on their ATAR results, as well as to consider your preferences based on feedback from interviews, folio presentations and auditions.

Preferences can be changed as many times as you like up until the closing date.

The Change of Preference period for VCE (including VCAL) students closes at 12 noon, Monday 23 December 2013.

Should I change my preferences?
If you decide to change your preferences, make sure you have considered all your options.

Here a checklist before you decide to take the plunge

- Checked VTAC’s list of new and cancelled courses on the VTAC website and via updates on the VTAC’s Facebook page
- Investigated all of your course options by logging onto VTAC CourseLink from the VTAC website (www.vtac.edu.au) and following the link to Student Access to:
  - Compare your ATAR with last year’s clearly-in report to find out whether your results are in the ballpark for consideration this year
  - Cross check your VCE study program against existing perquisite studies
  - Refine your search by region and/or interest area
- Checked that you have satisfied any extra requirements.

How to change your preferences
To change your preferences, log on to your user account through the VTAC website using your student number and VTAC pin and list your preferences in order in which you wish to accept them, not the order that you think you will be offered a place.

The website is available 24 hours a day and the website is at its busiest between 4pm and 9pm, so it is recommended you log on outside these peak times.

If you are happy with your preferences as they are, there is no need to change them.

Change of Preference will close at 12 noon (AEDST) Monday 23 December 2013.

Forgotten your VTAC PIN? Click on the ‘lost PIN’ link on the front page of the website and follow the prompts.

Can’t remember your VCAA student number? If you know your PIN, telephone VTAC for further assistance. Your VCAA student number is identical to your VTAC application number.
**Facts and Fiction**  
*By Suzanne Connelly, VTAC*

For whatever reason there are many stories surrounding scaling and the scaling of VCE studies. With students about to receive their ATAR now is an ideal time to look at the facts and not the fiction!

**Fiction:**

You need to do ‘hard’ studies to get a good ATAR.

If you do studies that are scaled up you will automatically get a high ATAR.

If you do studies that are scaled down you will get a low ATAR.

**FACTS:**

The study score provided to you by the Victorian Curriculum and Assessment Authority (VCAA) reflects your relative position against other students doing that study.

The scaling process, used to construct VTAC Scaled Study scores from VCE study scores, adjusts scores so that there is no scoring incentive to select one study rather than another. It is false to assume that there is an advantage in choosing studies which are scaled up: scaling up compensates for what would otherwise be a disadvantage.

• Jess chose a study because it was likely to be scaled up, but she was not very interested or strong at it. She got a VCE study score of 25 for the study, which was scaled up to an ATAR subject score of 29. This was lower than the rest of her VTAC Scaled Study scores, all scaled down to between 32 and 34. Jess would have been better off choosing all her studies based on her interests and strengths.

• Morgan on the other hand chose all his studies based on his strengths and interests. Morgan still selected two studies that were scaled down, but got VCE study scores of 38 for one and 40 for the other. These were scaled down to 36 and 39 respectively. These were about the same as the rest of Morgan’s VTAC Scaled Study scores, which were around 38 to 39. Morgan was not disadvantaged by choosing those studies.

When the VTAC Scaled Study scores are added together and translated into an ATAR, it is likely that Morgan will receive a higher ATAR than Jess, even though two of his studies were scaled down.

-------------------------------------------------------------------------

**Fiction:**

An additional five points is added to the ATAR if you do a VCE Language

**FACT:**

The adjustment is made as part of the scaling process for each language, not the ATAR. Five points is added to the scaled mean of each VCE Language, not to the scores of individual students. All students receive an increase, but it is not the same for all students. For study scores at or close to 30, the increase is five, but it decreases as the score moves away from 30 in either direction.

-------------------------------------------------------------------------
Fiction:  
The ATAR is a score out of 100.

FACT:  
The ATAR is a ranking, not a score. There is no pass or fail ATAR. Every VCE student who receives an ATAR has successfully completed the VCE. An ATAR of 50 is not the pass rank, nor is it the average rank. An ATAR of 50 means you have performed better than 50% of the state group.
Tertiary Selection and the ATAR

By Elaine Wenn, VTAC

This year more than 43,600 Victorian students who completed their secondary education have applied for tertiary courses. In the majority of the 1,700 plus courses offered, there are more applicants than there are places available. Each institution therefore needs to select from the list of applicants those who will receive offers. Selection officers in the institutions handle this process.

VTAC administers the course application, selection and offer processes, and provides applicant information (including VCE and VCAL results) to the selection officers. In selecting students, selection officers largely use information about each applicant’s VCE performance. The information used, and how it is used, varies from course to course.

VTAC administers the course application, selection and offer processes, and provides applicant information (including VCE and VCAL results) to the tertiary institution selection officers. When selecting students, selection officers largely use information about each applicant’s VCE performance. The information used, and how it is used, varies between institutions and courses.

First, an applicant must meet the minimum tertiary entrance requirements. For higher education courses this is usually satisfactory completion of the VCE including the completion of Units 3 and 4 in one of the VCE English studies in the same year. The same minimum requirement applies for most VET courses, however it does vary between institutions. For more information about minimum tertiary entrance requirements please see the VTAC Guide or VTAC website.

Second, an applicant must meet any VCE prerequisites for the course. Students not satisfying the prerequisites are generally not considered for the course.

The third factor used in selection is an overall measure of how well an applicant performed in all their VCE studies compared with all other VCE students. This measure is called the Australian Tertiary Admission Rank (ATAR) and is developed for the purposes of tertiary selection only.

The ATAR is only calculated for students who have completed their VCE and have met tertiary entrance requirements.

Selection

The ATAR is not the only mechanism used for tertiary selection, and it is not used for all VCE applicants. A large number of courses use a range of other selection mechanisms such as interviews, performance auditions, assessment of folios and tests such as aptitude tests. Other criteria may include performance in prerequisite studies or other studies relevant to the course. Applications for special consideration are also taken into account.

All universities are committed to considering around 20% of applicants on a range of criteria broader than just the ATAR. TAFE institutes and independent tertiary colleges normally use a range of criteria including the ATAR and interviews and generally do not select mainly on the ATAR.
What counts towards the ATAR?

By Paul Livingstone VTAC

The ATAR is based on up to six VCE results. The results do not all have to be from the one year. The ATAR is calculated using:

- a student’s best score in any one of the English studies plus
- the scores of their next best three permissible studies (which together with the English study make the ‘Primary Four’), plus
- 10 per cent of the scores for any fifth and sixth study which they may have completed (these are called increments).

If a student has the Primary Four they will get an ATAR. VTAC will use up to six results in calculating the ATAR. If a student has more than six results, the six scores that give the highest ATAR are used.

Studies used in the calculation of the ATAR may be taken over any number of years, however the length of time taken to complete VCE studies may be taken into account by institutions.

Vocational Education and Training (VET) programs

VET programs included in the VCE Unit 1 to 4 framework contribute to the ATAR in the same way as VCE studies.

Scored Unit 3 and 4 VET sequences are deemed equivalent to VCE Unit 3 and 4 sequences.

Un-scored Unit 3 and 4 VCE VET sequences may count as a fifth and/or sixth increment which is calculated from the average of the Primary Four VTAC Scaled Study Scores.

Where the VCAA has granted block credit at Units 3 and 4 level, recognised VET or Further Education qualifications at AQF3 or above are eligible for inclusion as a fifth or sixth study increment in the calculation of the ATAR. This increment is calculated as for un-scored Unit 3 and 4 VCE VET sequences.

Approved Higher Education Studies in Schools

Students undertaking an approved Higher Education Study in Year 12 can include the result as an increment in the ATAR (fifth or sixth study) provided that it is passed, that VCAA co-requisite or prerequisite conditions were met, and study combination restrictions were met. An increment will be awarded for the Higher Education Study, depending on the level of results achieved in the Higher Education Study:

- If the student’s average result over all the Higher Education Study units is at least 90%, the Higher Education increment will be 5.0.
- If the student’s average result over all the HE study units is at least 80% but less than 90%, the Higher Education increment will be 4.5.
- If the student’s average result over all the HE study units is at least 70% but less than 80%, the Higher Education increment will be 4.0.
- If the student’s average result over all the HE study units is at least 60% but less than 70% the Higher Education increment will be 3.5.
• If the student’s average result over all the HE study units is at least 50% but less than 60% the Higher Education increment will be 3.0.

Restrictions

There are some restrictions on how certain combinations of studies may be counted for an ATAR.

In each of the study areas of English, mathematics, history, information technology, languages and music:
  • at most two results can contribute to the Primary Four
  • at most three results can contribute to the ATAR, the third being counted as a 10% increment for a fifth or sixth study

This includes Higher Education studies also. So, if the ATAR incorporates a Higher Education study increment from any of the study areas listed above, then at most two VTAC Scaled Study Scores and/or VET increments from that study area may be used.

There are other specific restrictions where two or more studies have similar content, or where studies have been combined.

There are no restrictions on the number of VET results that can be counted in the 2013 ATAR. However, there are industry area restrictions on VET studies similar to the study area restrictions listed above. There are 26 separate industry areas.

For further information refer to the VICTER (Victorian Tertiary Entrance Requirements) publication available on the VTAC website
How is the ATAR calculated?

By Paul Livingstone

The following process is used to calculate each student’s ATAR.

All Study Scores are scaled to adjust for the fact that it is more difficult to obtain a high Study Score in some studies than others. Once they have been scaled, they are referred to as VTAC Scaled Study Scores.

An Aggregate is calculated by adding:

- a student’s best VTAC Scaled Study Score in any one of the English studies, plus
- the VTAC Scaled Study Scores of their next best three permissible studies, plus
- 10 per cent of the VTAC Scaled Study Score for a fifth study (where available), plus
- 10 per cent of the VTAC Scaled Study Score for a sixth study (where available).

The Scores contributing to the Aggregate are subject to the study restrictions described above.

The Aggregate is a number between 0 and a value over 210.

All eligible students are then ranked in order of their Aggregate, and a percentage rank is assigned to distribute students as evenly as possible over a 100 point scale. All students with the same Aggregate receive the same percentage rank. If a number of students are tied on a particular Aggregate the number that receives the corresponding percentage rank may increase.

Finally, the percentage rank is converted to an ATAR, which is the estimate of the percentage of the population in the relevant age group that the student outperformed, taking into account the students who have successfully completed VCE as well as those who moved or left school before Year 12.

The ATAR is a number from 0 and 99.95 in intervals of 0.05. The highest rank is 99.95, the next highest 99.90, and so on. The lowest automatically reported rank is 30.00, with ranks below 30.00 being reported as ‘less than 30’.

A complete list of studies and VTAC Scaled Study Scores used in the calculation of a student’s ATAR are included on their ATAR statement.

Why are VCE results scaled?

Each of a student’s Study Scores provided by the VCAA is calculated from the total marks the student receives for each graded assessment in that study. The Study Scores for all studies are reported on a scale of 0 to 50 with an average score of 30.

The Study Score is not a score out of 50. It is a ranking or relative position which shows a student’s performance compared with all other students who took that study in that year. A student with a Study Score of 30 is in the middle of the cohort, or has performed better than about half of all students who took that study in that year. A student with a Study Score of 40 has performed better than about 91% of all students who took that study in that year.

What this means is that the middle student in any study will have a Study Score of 30, regardless of how strong the other students were in the study and how difficult it was to achieve the middle ranking.
VTAC’s role is to provide a way of ranking students that is fair to students, regardless of the studies they have taken.

Where the student competition in a study is higher, Study Scores have to be adjusted upwards; otherwise students doing that study would be unfairly disadvantaged.

Similarly, in a study where the student competition is lower, the Study Scores have to be adjusted downwards; otherwise students doing that study would be unfairly advantaged.

Scaling ensures that it is possible for students to attain a high ATAR regardless of the combination of studies they undertake.

This is not always well understood and many students believe that to achieve their best possible ATAR they need to choose studies that are scaled up. This is not true and may even work against them.

If a student chooses a study that they are not very good at simply because it will be scaled up, the Study Score they receive will be a lot lower than what they would expect in a study they are good at and that interests them. Yes, the score will be scaled up, but from a lower Study Score. It is unlikely that the VTAC Scaled Study Score would be any higher than if they had chosen a more suitable study, even one that is scaled down.

The way to ensure that a student achieves the best ATAR is to choose studies according to what interests them; what they are good at; and what studies they need for future study.

The calculation of the ATAR is a complicated process, but it is the fairest system developed by experts which allows students to undertake the studies they want and enables tertiary institutions to compare students who have completed different combinations of VCE studies.

The use of the ATAR guarantees that all studies are treated equally and provides students with a common score for tertiary selection across Australia.
How does scaling work?

by Paul Livingstone

VTAC adjusts the Study Scores for each study to take account of how strong the students were in the study and how difficult it was to achieve the middle ranking. The strength of competition in each study is measured by how well the students performed in all their other studies.

In each study, the Study Scores are adjusted so that the overall level of scores in that study matches the scores obtained by the same group of students in all of their other studies.

For example, in Chemistry in 2012 the average Study Score was 30, but the students who took Chemistry averaged 34 for all their studies (including Chemistry). This shows that the students who did Chemistry in 2012 were of above average strength in their other studies. Therefore, the scaling process adjusted the Study Scores upwards so that the average VTAC Scaled Study Score for Chemistry was set at 34.

The 2012 Geography students averaged 29 in all their studies (including Geography). So, the scaling process adjusted the Study Scores downwards so that the average VTAC Scaled Study Score for Geography was 29.

In some studies the scaling process produces VTAC Scaled Study Scores that are greater than 50. They can go as high as 55. However, the minimum VTAC Scaled Study Score cannot go below zero.

VCE studies are always scaled in the year in which they were undertaken. This may not necessarily be in the year in which a student receives their ATAR.

This scaling process is carried out each year for each VCE study and VCE VET program for which there is a Study Score. There are no predetermined outcomes—the adjustments are based on the performance of students each year. Nevertheless, the process is very stable and there is little difference in the scaled VTAC Scaled Study Scores from year to year.

Mathematics and Languages

Mathematics

VCE mathematics studies are designed to cater for students of differing abilities and interests. Specialist Mathematics is the most difficult, followed by Mathematical Methods (CAS) and then by

Further Mathematics.

To ensure that students undertaking the more difficult mathematics studies are not disadvantaged, all three mathematics studies are scaled against each other as well as being scaled against all other studies. The higher of the two resulting scales is used.

Languages

As a result of government policy to encourage the study of languages each Language is adjusted up by adding five to the initial VTAC Scaled Study Score average. All students of a Language receive an adjustment, but it is not a uniform adjustment.

For example a student achieving a perfect Study Score of 50 is guaranteed a VTAC Scaled Study Score of at least 50. The maximum VTAC Scaled Study Score only goes above 50 when
the average score is very high (the scaled mean plus twice the scaled standard deviation exceeds 50). Published means for each Language include this adjustment.

**Other variables**

**Previous VCE studies**

VVCE studies are always scaled in the year in which they were undertaken (this may not necessarily be in the year in which a student receives their ATAR).

**Further VCE study**

Students who have previously obtained an ATAR, but have undertaken further study resulting in an additional Study Score or Increment, are eligible to have their ATAR recalculated. The higher of the two will be recorded and reported as an ATAR. Ranking for courses will be based on the highest ATAR achieved. VTAC will, however, inform course selection authorities of all of an applicant’s VCE results—including those not contributing to their ATAR.

**Notional ATAR**

A ‘Notional ATAR’ is used to rank students who have a previous Year 12 (other than VCE) or some other qualification (e.g. the International Baccalaureate, also known as the IB).

A Notional ATAR is created for:

- all applicants who successfully completed a full Victorian Year 12 attempt prior to 1992,
- all applicants who (without having successfully completed a full Victorian Year 12 attempt prior to 1992) have for the first time, at least four Study Scores and VCE (HSC) ‘Group 1’ subjects, or their predecessors in combination including any one of the English group (i.e. at least four scorable subjects), and
- all International Baccalaureate students who qualify for the IB Diploma in the current year.

Note: Only Victorian IB students who sit the GAT will be issued with a Notional ATAR statement.

**Interstate use of the ATAR**

If a student has applied to institutions in other Australian states they will be considered on the basis of their ATAR.

**Interrupted study status**

Applicants granted official interrupted study status by the VCAA should seek advice from VTAC about the applicability of rules and provisions in this publication. In general, the rules that require completion of Units 3 and 4 in the one year do not apply to applicants granted interrupted study status in the studies concerned.
