About VICTER

VICTER is published by VTAC for students who are considering applying for tertiary study in 2016.

It is written to help Year 10 students make choices about their Year 11 and 12 studies so that they can plan their pathways towards tertiary study.

VICTER provides information about entrance requirements for courses commencing in 2016 in universities, TAFE providers and independent tertiary colleges that participate in the VTAC system. Each institution which accepts applications and offers through VTAC has listed the courses it plans to offer in 2016 (as at 30 June 2014). For each course that has prerequisites, the institution lists the prerequisites and the selection criteria.

Courses without prerequisites are listed under each institution. There are hundreds of courses in the VTAC system without prerequisites. Institutions may amend their 2016 course prerequisites up until 31 August 2015. This online publication will be updated regularly so students can access the most up to date course prerequisites.

It is important to note that changes are only permitted in the following circumstances:

- Addition of prerequisite subjects as alternatives to those prerequisite studies already published.

Information for courses at institutions where applications are through VTAC is available in section one under courses and institutions.

VICTER also lists institutions which administer their own applications and offers but promote their courses through VTAC. These institutions are listed in section two under courses and institutions.

Refer to CourseSearch on the VTAC website for a more extensive list of the types of courses available through VTAC and directly. Refer to the major studies index available in the current VTAC Guide and on page 54 of this publication.

The important thing to remember is that the study choices you make now are not binding for life and, like most of us, you will probably make several different work and career choices throughout your life.

Study choice is a personal decision and requires you to think carefully about what you are good at, what you are interested in and what studies help keep your options open.

Information is correct at the time of publication. Any changes will be notified to schools in VTAC Gazettes, in this online publication and through VTAC’s blog and Facebook pages.

Please note that the inclusion of course information in this document does not guarantee:

- the course will be available in 2016
- the course will be available at the published campus
- the course name will remain the same.

Enquiries about any information in this publication should be directed to the Deputy Director Information and Publishing Services, VTAC.

Some hints to help you choose your VCE study program:

Do:
- think about what interests you and what you like doing
- check out the VCE studies your school is offering
- talk with your careers teacher and/or VCE coordinator
- keep your options open
- log on to VTAC CourseLink to start researching the types of courses you are interested in
- attend Open Days.

Don’t:
- panic if you have no idea what studies to take up
- choose studies you don’t like just because you think doing those studies will help you get a good ATAR—your ATAR represents your performance across all of your studies
- choose studies based on their scaling. There is no point selecting a study that you struggle with simply because it has traditionally been scaled up. You will get higher scores in studies that you like and are good at, even after scaling.

For further information about study selection and scaling refer to Choice or the VTAC website.

Entrance requirements

This section provides information about tertiary entrance requirements and the ATAR.

To be offered a place in a course you must:
- meet the minimum tertiary entrance requirements for Victoria
- meet any VCE prerequisites (or equivalent) for the course, and
- be selected in competition with other eligible applicants.

Minimum tertiary entrance requirements

Vocational education and Training VET: Certificate II and Certificate III

There are no set minimum tertiary entrance requirements for entry to Certificate II and III courses in VICTER 2016, however institutional and course requirements still apply.

Minimum tertiary entrance requirements for general entry are outlined below.

Vocational education and training VET: Certificate IV, Diploma, Advanced Diploma

For Year 12 students, the minimum tertiary entrance requirement for VET courses available at TAFE providers and independent tertiary colleges is:

- The satisfactory completion of both the VCE # and Units 3 and 4 English (any)* or equivalent senior secondary completion such as Senior VCAL or literacy requirements as stated in VET Training packages/curriculum. VET courses are displayed with this colour:
  - Vocational Education and Training Qualification

Higher education

For higher education courses the minimum tertiary entrance requirement for courses available at university, independent tertiary colleges and TAFE providers is:

- The satisfactory completion of both the VCE# and Units 3 and 4 English (any)* or equivalent.

Note: Some institutions may accept applicants with equivalent senior secondary completion such as Senior VCAL—check with individual institutions for their entrance requirements. Higher education courses are displayed with this colour:
  - Higher Education Qualification

#VCE VET qualifications, including block credit granted for VET or Further Education training, may contribute to the award of the VCE.

*Any of the four VCE English studies—English, English (EAL), Literature or English Language—satisfies the requirement for English (any), however Units 3 and 4 must be completed in sequence and in the same calendar year (unless granted interrupted study status by the VCAA in the studies concerned).

VCE = Victorian Certificate of Education
VCAL = Victorian Certificate of Applied Learning

Other qualifications

Applicants may be considered as satisfying minimum tertiary entrance requirements on the basis of other qualifications. These may include completion of:
- the International Baccalaureate Diploma
- overseas qualifications deemed comparable by VTAC to the required Victorian qualifications.

Victoria uses the home state rule for determining minimum tertiary entrance requirements for interstate applicants. The rule states:
- If an applicant meets minimum tertiary entrance requirements for all institutions in their home state, they will meet minimum tertiary entrance requirements for all interstate Australian institutions.

Note: For the purposes of ATAR calculation and university admission under the home state rule, Northern Territory and South Australia are combined and treated as a single entity. The eligibility requirements applied to students presenting the SACE will be applied to students presenting the NTCE.

VTAC automatically assesses these qualifications as part of the application process and advises appropriate course authorities of the status of any such applicants.

Refer to the Student Access function of VTAC CourseLink to view a list of interstate study equivalences.

Course requirements

A number of courses have requirements additional to the minimum tertiary entrance requirements. These may be in the form of:
- Prerequisite studies
- Selection requirements

If you do not meet the prerequisite(s) for a course you may not be selected for that course, however your results will still be provided to the course selection authorities of each course to which you have applied.

Prerequisites

Units 1 and 2 prerequisites

If a course specifies Units 1 and 2 of a study as prerequisites, this means that a satisfactory result must be awarded in both Units 1 and 2.

Units 3 and 4 prerequisites

If a course specifies prerequisites for a study at Units 3 and 4, this means that a minimum study score will be specified.

Selection requirements

In addition to the requirements outlined above, many courses have selection requirements such as a folio, an interview, performance audition or completion of a questionnaire.

Details of course selection requirements are not contained in this publication, but will be available in course entries for 2016 available in July 2015. This is because selection requirements often include requirements that must be met on particular dates for the year concerned. As a guide however, you might like to refer to the current course entries using CourseSearch on the VTAC website.

How do institutions select applicants?

Approximately 50% of the courses accepting applications and offers through VTAC use a range of criteria that may include the ATAR as well as other factors such as interview, folio presentations, pre-selection tests, additional forms and so on.
What is the ATAR?
The ATAR is an overall percentile ranking reflecting a student’s comparative Year 12 achievement compared to the relevant age group in a given year. The ATAR allows tertiary institutions to compare students who have completed different combinations of VCE studies. It is calculated by VTAC solely for use by institutions.

The ATAR is reported as a rank between 0.00 and 99.95 with increments of 0.05. An ATAR of 75.00 means that a student with that ATAR has achieved VCE results above 75% of the population of the relevant age group.

Eligibility for an ATAR
To qualify for an ATAR a student must:
- qualify for the VCE
- achieve study scores in at least four permissible Unit 3 and 4 VCE studies, including one from the English group.

Who receives an ATAR?
VTAC calculates an ATAR for all students who have qualified for an ATAR, however only those who apply through VTAC for tertiary courses and paid their VTAC processing fees receive an ATAR statement. An ATAR will be calculated by VTAC for applicants when they first qualify for an ATAR. If you undertake further study in a later year and are awarded at least one study score or complete a non-scored VET sequence that entitles you to an additional VET increment, a new ATAR will be calculated. Ranking for courses will be based on the highest ATAR achieved.

You will receive an official statement containing your ATAR from VTAC at the same time that you receive study scores from the VCAA if you have applied for tertiary entry through VTAC.

Calculation of the ATAR
Your ATAR is developed from an aggregate produced by adding your results for up to six studies as follows:
- the VTAC scaled study score in one of English, English (EAL), Literature or English Language
- the three next highest VTAC scaled study scores permissible (which together with the English study make the “primary four”)
- 10% of any fifth and sixth permissible scores that are available (these are called increments).

If you have more than six results, the six permissible results that give the highest ATAR are used.

Studies used in the calculation of the ATAR may be taken over any number of years; however the time taken to complete VCE studies may be taken into account by institutions when considering applicants.

You are then ranked in order of these aggregates—the highest rank being 99.95 and then decreasing in steps of 0.05. The group of students with the highest aggregates will be assigned the highest rank of 99.95. The lowest automatically reported ATAR is 30.00, with ATARs below 30.00 being reported as ‘less than 30’.

Notional ATARs
Notional ATARs are used to rank applicants who either have previous Victorian Year 12 results (other than VCE results) or another qualification obtained in Victoria such as the International Baccalaureate. In the case of previous Victorian Year 12 results, a Notional ATAR is calculated using the same rules as for the ATAR. For other qualifications, different methods are used whilst still adhering to the same underlying principles. Further information may be obtained from VTAC.

Only Victorian IB students who sit the GAT and are VTAC applicants will be issued with a Notional ATAR statement.

Interstate use of ATARs
Victorian VCE applicants applying for tertiary courses in other Australian states will be considered on the basis of their ATAR.

Scaling study scores for the ATAR
In calculating study scores, the VCAA does not determine any measure of overall performance in the VCE, but rather the performance of each student in each individual study. In order to facilitate selection, institutions require an overall measure of the performance of students undertaking the VCE in all studies.

Before the scores of different VCE studies can be added together for the ATAR, they need to be scaled to take account of the different abilities of the students taking different studies.

The study score is not a score out of 50. It is a ranking or relative position which shows a student’s performance compared with all other students who took that study in that year. A student with a study score of 30 is in the middle of the cohort, or has performed better than about half of all students. A student with a study score of 40 has performed better than about 91% of all students who did that study.

What this means is that the middle student in any study will have a study score of 30, regardless of how strong the other students were in the study and how difficult it was to achieve the middle ranking. This does not mean that some studies are inherently more difficult than others. In fact, most are designed to be of equal difficulty. However, the stronger the competition, the harder it is to achieve the middle score of 30.

So all study scores are scaled by VTAC before they are used to calculate the ATAR. Scaling adjusts the study scores in each study to take account of the strength of competition among students taking the study. The strength of competition in each study is measured by how well the students in that study performed in their other studies. The study scores are scaled so that the overall level of scores in that study matches the scores obtained by the same group of students in all of their other studies combined.

Once the study scores have been scaled, they are called VTAC scaled study scores. It is the VTAC scaled study scores that are used to calculate the ATAR. VCE studies are always scaled in the year in which they were undertaken (this may not necessarily be in the year in which you receive your ATAR).

By using VTAC scaled study scores, fair comparisons can be made of students' achievements over all their studies, regardless of the studies they have taken.

Because of this, students can freely choose studies they like or are good at without worrying about their ATAR.

This is not always well understood and many students believe that to achieve their best possible ATAR they need to choose studies that are scaled up. This is not true and may even work against you. Every year there are many students who achieve high VTAC scaled study scores for studies that have been scaled down, and achieve lower VTAC scaled study scores for studies that have been scaled up.

Australian Tertiary Admission Rank (ATAR)
If you choose a study that you are not very good at simply because it will be scaled up, the study score you receive will be a lot lower than what you could expect in a study you are good at and that interests you. While your score will be scaled up, it is unlikely that your VTAC scaled study score would be any higher than if you had chosen a more suitable study, even one that is scaled down.

The way to ensure that you achieve your best ATAR is to choose your studies according to what you are interested in; what you are good at; and what studies you need for future study.

The calculation of the ATAR guarantees that all studies are treated equally and provides you with a common score for tertiary selection across Australia.

Studies with additional scaling

Mathematics

VCE Mathematics studies are designed to cater for students of differing abilities and interests. Specialist Mathematics is the most difficult, followed by Mathematical Methods (CAS) and then by Further Mathematics.

To ensure that students undertaking the more difficult mathematics studies are not disadvantaged, all three mathematics studies are scaled against each other as well as being scaled against all other studies. The higher of the two resulting scales is used.

Languages

As a result of government policy to encourage the study of languages, a further adjustment is made during the scaling process. Each VCE Language is adjusted up by adding five to the initial VTAC scaled study score average. All students of a VCE Language receive an adjustment, but it is not a uniform adjustment. For study scores at or close to 30, the adjustment is 5, but the adjustment decreases as the study score moves away from 30.

Studies used for the ATAR

Subject to the rules and restrictions that are described in the sections that follow, the studies that can be used for the ATAR are:

- All VCE Unit 3 and 4 sequences
- Vocational Education and Training (VET) Programs with Unit 3 and 4 sequences
- Approved Higher Education studies.

VET Programs

VET programs that contribute to the VCE are used in the calculation of the ATAR as follows:

VCE VET Unit 3 and 4 sequences with scored assessment:

- study scores are scaled and may be included in the calculation of the ATAR aggregate
- where a scored assessment is available and you decide not to take it, no increment will be available.

VCE VET Unit 3 and 4 sequences with no scored assessment available:

- may be counted as fifth and sixth studies. The increment will be 10% of the average of the primary four VTAC scaled study scores.

If you have completed two VET Unit 3 and 4 sequences deemed by the VCAA to be equivalent because of significant duplication only one result can contribute to the ATAR. If one sequence has scored assessment available, then your result in the scored sequence will be used in the calculation of your ATAR. If both sequences have scored assessment, then the higher result will be used. If neither sequence has scored assessment, one VET increment will be available.

Restriction on use of VET results within an Industry Area

Only in cases where no scorable sequence in an industry area has been attempted, can two VET increments from that area contribute to the ATAR.

Where a single scorable VCE VET sequence has been attempted in an industry area, then that result will be the first possible industry area contributor to the ATAR, and at most one increment can be added by non-scorable VET or VFE sequences in the same industry area.

Where two scorable non-equivalent VCE VET sequences have been attempted in an industry area, then those results will be the first possible industry area contributors to the ATAR, and at most one increment can be added by non-scorable VET or VFE sequences in the same industry area.

Where more than two scorable non-equivalent VCE VET sequences have been attempted in an industry area, then only those results will be possible industry area contributors to the ATAR, with at most two being permissible in the primary four and at most three being permissible in the ATAR.

It should be noted that VET sequences within the Information Technology industry area are also considered to be in the IT Studies study area, whilst VET sequences within the Music Industry area are also considered to be in the Music Studies study area.

Restriction on use of VFE Block Credit in the ATAR calculation where a student has previously been awarded an ATAR

In cases where a student was previously eligible for an ATAR, new VFE results only contribute to the ATAR when fewer than six VCE and VCE VET results are available.

Policy Update:

Restriction on use of VFE Block Credit in the ATAR calculation where a student has previously been awarded an ATAR

For an ATAR calculated up until and including 2014, if a student was previously eligible for an ATAR, then new VFE results can only contribute to the ATAR when fewer than six VCE and VCE VET results are available. For ATARs calculated in 2015 and later VFE results can only be used in the calculation of an ATAR if there are fewer than 6 VCE or VCE VET studies available. If there are 6 or more VCE or VET studies available. If there are 6 or more VCE or VCE VET studies available, a VFE block credit result cannot be used.
Approved Higher Education studies in schools

The VCAA provides for very able students to have an opportunity to undertake an approved Higher Education study as part of the VCE. Such studies are recognised as Higher Education studies contributing to completion of the VCE. Higher Education studies include first year university studies and advanced standing TAFE courses recognised by the VCAA and made available to VCE students who are very able academically and have the endorsement of their school principal.

If you are undertaking such a study, it may count as an increment (fifth or sixth study) in the ATAR provided that it is passed, that VCAA co-requisite or prerequisite conditions were met, and subject to the restricted study combinations below.

Upon satisfactory completion an increment will be awarded for the Higher Education study and will be determined as follows:

- Where a student completes a Higher Education VCE study and the average mark over all the HE units awarded is at least 90, the Higher Education increment will be 5.0.
- Where a student completes a Higher Education VCE study and the average mark over all the HE units awarded is at least 80 but less than 90, the Higher Education increment will be 4.5.
- Where a student completes a Higher Education VCE study and the average mark over all the HE units awarded is at least 70 but less than 80, the Higher Education increment will be 4.0.
- Where a student completes a Higher Education VCE study and the average mark over all the HE units awarded is at least 60 but less than 70, the Higher Education increment will be 3.5.
- Where a student completes a Higher Education VCE study and the average mark over all the HE units awarded is at least 50 but less than 60, the Higher Education increment will be 3.0.

Restrictions on use of approved Higher Education studies in schools

If your ATAR incorporates a Higher Education increment from any of the study areas of mathematics, English, languages, music, history or computer science/information technology then at most two VTAC scaled study scores and/or VET increments from that study area may be used.

All VCAA designated rules for Higher Education studies must be satisfied prior to a Higher Education study increment being available. Check the VCAA “VCE and VCAL Administrative Handbook” and current VCAA “Bulletin VCE, VCAL and VET” for the latest information.

The VCAA Handbook states that only one Higher Education Study may count towards satisfactory completion of the VCE. Similarly, only one Higher Education Study may contribute to your ATAR.

Restrictions on subject use in the ATAR calculation

The restrictions listed here are for studies completed after 2007. Additional restrictions may apply where earlier studies have been completed. Contact VTAC for further information.

Restrictions on studies in the ATAR

Only one of the following combinations can be used in the best six (that is, in the calculation of the ATAR):

- English/English as an Additional Language (EAL)
- Chinese (FL)/Chinese (SL)/Chinese (SL Advanced)
- Indonesian (FL)/Indonesian (SL)
- Japanese (FL)/Japanese (SL)
- Korean (FL)/Korean (SL)
- Mathematical Methods/Mathematical Methods (CAS).

In each of the study areas of English, mathematics, history, Contemporary Australian studies, information technology, languages and music:

- at most two results can contribute to the primary four
- at most three results can contribute to the ATAR, be they VCE results, Higher Education study results, or VET results.

The studies included in these study areas are those listed in the appropriate study area groupings (see page 12).

Please note: The VET industry area restrictions and VFE Block Credit restrictions also apply.
### Types of institutions & courses to get you started...

#### Higher education

| **Courses** | Higher education courses provide professional qualifications with an emphasis on theory and the development of transferable skills. Some courses are vocational, leading to careers in clearly identified areas (e.g., Accounting) while others are 'generalist' with no particular vocational skills component. Although courses vary, many higher education courses include formal lectures and tutorials. |
| **Length** | The majority of higher education courses with applications through VTAC are bachelor degrees and a few associate degrees. A basic undergraduate degree usually requires a minimum of three to four years full-time study. Many courses such as combined degrees and industry-based learning (work experience degrees are longer). For further information about Higher education courses through VTAC see CourseSearch on the VTAC website. |

#### Vocational Education Training (VET) courses

| **Courses** | VET courses provide professional and para-professional qualifications with an emphasis on practical skills and vocational pathways that lead into higher level training, higher education or employment. A wide variety of study areas are offered; each one involving training for expertise in a particular skill area. VET qualifications are designed for close consultation with industry to ensure the training is current and relevant for industry requirements. Class sizes are usually small allowing for individual attention. These courses may be work based or involve a work placement. VET courses available through VTAC or directly include certificate II, certificate III, certificate IV, diplomas and advanced diplomas. |
| **Length** | Diplomas and advanced diplomas are normally equivalent to two years full-time study. Some courses offer one year accelerated programs. Refer to the individual course entries in the VTAC Guide 2013, under title and length, for specific details. Certificate IV can be (but are not always) equivalent to one year full-time study. For general VET course enquiries telephone 131 823. |

#### Teaching styles

| **University** | University teaching styles vary, however they generally include formal lectures, tutorials, seminars, practical workshops and/or laboratory classes and work experience placements. |
| **TAFE** | TAFE teaching styles involve small classes, individual attention and diverse programs. They are devised to ensure that they are highly accessible, provide a range of pathways and ensure practical learning while bridging the gap between work and education. |
| **Independent Tertiary Colleges** | Independent tertiary colleges offer a diverse range of teaching styles including lectures, workshops, laboratory classes, seminars, small group tutorials, practical work placements, industry visits and self-paced virtual classrooms. Courses may lead to employment or further study at degree or postgraduate level. A number of these courses offer credit transfer or arrangements with other institutions. |
About selection

VTAC does not select applicants or influence decisions made by institutions. Selection is the responsibility of each institution's course selection authorities. When considering your application, course authorities take into account published institutional and course entrance requirements, prerequisite studies and methods such as interviews, folios and supplementary forms.

For a list of the methods used for selection to a course, see Selection criteria under the course information in CourseSearch on the VTAC website.

Two models of selection:
Approximately 50% of all courses use a range of criteria that may include the ATAR as well as other factors such as interview, folio presentations, pre-selection tests, additional forms and so on. Within this mix of criteria there may be different requirements for Year 12 applicants and non-year 12 applicants.

ATAR and two-stage process
For courses using this selection method about 80% of places are determined by the ATAR alone. For the remainder of places in these courses additional information is considered for the applicants who do not have an ATAR high enough to guarantee automatic selection, but have an ATAR above that which leads to automatic rejection. These applicants are evaluated in accord with the subject bonus criteria published in each year’s course entries under additional considerations.

Information about factors other than the ATAR are published in the selection criteria within each course entry. See selection criteria under the course information in CourseSearch on the VTAC website for details about the subject bonus. These factors are used in addition to the prerequisites and selection requirements in course entries to rank applicants and fill the balance of the course quota.

All study grouping areas are correct as at 30 June 2013, but may be revised on the VTAC website and through VTAC Gazettes to schools as soon as revision is confirmed.

*Indicates that the study is no longer being offered as part of the VCE.
Courses with prerequisites available in 2016 and courses without prerequisites

**Academy of Design Australia**
www.designacademy.edu.au

All applicants for Academy courses are required to attend an individual interview and present a folio of recent creative work. While not expected to be of professional quality, the folio should demonstrate a range of creative and technical skills relevant to the course(s) applied for. Interviews are an informal, friendly discussion about the applicant’s work, ambitions and interests. The interview panel consists of no more than two people who will ask questions relating to the Academy’s Selection Criteria.

The interview panel seeks to identify potential students who are self-motivated and show initiative and the ability to successfully develop knowledge and skills in one of the disciplines offered at the Academy.

To assist applicants to present their work in the best way possible the Academy offers a Folio Presentation workshops. For further information refer to [http://www.designacademy.edu.au/careers_portfolio_presentation.html](http://www.designacademy.edu.au/careers_portfolio_presentation.html)

**Academy of Interactive Entertainment**
www.aie.edu.au

For all AIE Advanced Diploma programs, there is no prerequisite. Applicants will be required to attend an interview in person on campus, online or over the phone if the applicant is located in Victoria’s regional areas or interstate. For the Bachelor of Games and Virtual Worlds (Programming), applicants need to have demonstrated a completion in Year 12 or equivalent and with a minimum pass grade in English and mathematics (which includes Calculus) or an approved bridging program and/or skills assessment in mathematics and English.

Game Art and Screen: Folio should demonstrate your creativity and art skills. Examples can include sketches, paintings, video clips, animation, multimedia, sculpture, photography, life drawing and graphic design.

Software Development: Folio should demonstrate your aptitude for computer programming. You can include actual code samples in the folio or any compiled working applications, such as Visual Basic projects, Flash/ActionScript files, custom databases, iPhone or Java applications, multimedia projects or game models.

Students will need to demonstrate their enthusiasm and potential to complete the program to a high standard. Areas covered at the interview include communication and teamwork skills, personal motivation, educational history, long-term career aspirations and an awareness of the program objectives. Where it is necessary to collect additional evidence regarding the selection criteria, students might be requested to participate in an interview which may include a written or oral skills assessment test.

General Principle of Admission Policy

The University’s Regional Bonus Scheme provides current Year 12 students attending a school in regional Australia with an automatic increase of 5 ATAR points. Students attending school in regional Victoria and regional New South Wales are also eligible to apply for the Principal Report Entry Program (PREP) which is administered through their school. Where a student does not meet entry requirements, CSU offers a number of pathway and supporting programs in areas such as Chemistry, English and Mathematics.

For more details on all the courses offered please see the University website [www.csu.edu.au](http://www.csu.edu.au) or contact CSU directly on 1800 334 733 or refer to the VTAC Guide.

Interview Criteria
In general terms the following areas may be covered during the interview process: communication and teamwork skills, personal motivation, careers outcomes and opportunities, and the ability to demonstrate an awareness and understanding of the course.

Art and Design Courses: Folios should contain items that best demonstrate the range of skills and abilities that the applicant has achieved in areas of art and design. Examples can include sketches, ideas, journals, print media, 3D models, photo media, digital arts, multimedia, painting, sculpture, drawings. Original examples are preferred where possible however photographic documentation is acceptable. Fashion folio preparation courses are available. This course is a practical, hands-on workshop to help you produce a tertiary level entry folio for fashion design courses.

Holmesglen

General Principle of Admission Policy

Information about prerequisites and selection criteria can be found at www.holmesglen.edu.au or by calling 03 9564 1555.

For degree programs, the eligibility requirement is successful completion of VCE. Some courses may require studies in VCE Units 3 and 4 Mathematics, VCE Units 3 and 4 English, folio submissions or an interview. Pathways through TAFE studies are available to applicants who do not satisfy entry requirements for a degree. Students who successfully complete a Diploma or Advanced Diploma in a related field may receive up to 8 to 12 credits for a degree. Special entry requirements may apply to mature age applicants.

Detail for Folio Preparation

Folios that best demonstrate the ability of an applicant to undertake a program in a particular discipline should be presented at interview. Folio contents are not limited to, but could include, observational drawing, sketches, concept drawings, use of the design process, 2D and 3D work, photography, media, short films, storyboards, textiles, fashion garments and other art forms and media. Original artwork is preferred, but good quality photographic documentation is acceptable.

Detail of Interview Preparation/Requirements

Courses that require interviews will cover areas such as motivation for completion of a particular course, communication skills, ability to present artwork, knowledge of course structure and job outcomes.

Monash College

A Monash College Diploma provides specialised preparation for direct entry to first or second year of specific Monash University degrees. Each Diploma has been developed in consultation with Monash University faculties and academic staff to prepare international students for success. Monash College offers four Diploma programs:

- Art & Design Studies
- Arts
- Business
- Engineering Studies

The Diploma program consists of two parts - Part 1 and Part 2 - each of eight months duration. Each eight month period is divided into two trimesters (except Engineering Part 2 which is delivered over three trimesters).

International students are eligible for entry into Part 1 or Part 2 of the Diploma programs, as dependant on existing qualifications and results. Domestic students are eligible for entry into all Part 2 Diploma Programs and Part 1 of the Diploma of Art and Design studies, as dependant on existing qualifications and results. There are three intakes throughout the year for maximum flexibility: February, June and October.

Courses with prerequisites available in 2016

- **Engineering**
  Prerequisites: Units 3 and 4: any English; and one of Maths: Mathematical Methods (CAS) or Maths: Specialist Mathematics; and one of Chemistry or Physics.
General Principle of Admission Policy

Institutional Requirement
VCE: A minimum of four Units 3 and 4 study scores including a study score of at least 30 in English (EAL) or 25 in any other English is required. See course entries for further details and specific faculty requirements on the level of achievement in study scores.

Eligibility score
Monash University has set an eligibility score for courses (based on ATAR). A list of the University’s eligibility scores can be found at the Going to Uni website. Please note that the University also has a minimum ATAR of 70.00 for all Bachelor Degree courses, even where subject bonus is not used or where a range of selection criteria is used. This applies to both Commonwealth Supported and International Full Fee places. Domestic applicants who receive a SEAS bonus may be selected under the eligibility score or the University’s minimum ATAR if the bonus lifts them above this rank.

Details of Folio Preparation/Requirements
The folio should contain 10 to 15 items that give the best indication of the standard and potential of the applicant’s work. Applicants should present a folio which best demonstrates skills in their chosen field. Examples can include design work/ideas, drawings, drawing models, paintings, photography, prints, 2D or 3D works. The submission of sketchbooks, art notebooks and journals is also acceptable. Original works are preferred, but where works are too large to bring to the interview, they can be presented in photographic form, preferably in colour. Applicants who live interstate or in remote areas, or who cannot produce their folio because it is required for external examination purposes, should present photographic evidence of their work in colour. You will also be required to submit a digital copy of the folio you present. Information on presenting a folio for interview is available at: www.monash.edu/mada/apply

Details of Interview/Preparation Requirements
Art Design and Architecture courses: An interview panel will study the quality and potential of the folio and assess ability and motivation for successful study and communication skills.

Course offerings are correct at the time this information is published but additional double degree combinations are expected to be approved for introduction 2016 and 2017. Check the relevant VTAC Guide for the full list of available course combinations.

### General Statement

All selection requirements for VTAC courses at NMIT are contained in the VTAC Guide 2015 along with prerequisites for the Institute’s Degree and Associate Degree programs. Further course information can be obtained on the NMIT website [www.nmit.edu.au](http://www.nmit.edu.au).

### Audition/Folio/Interview

Applicants required to submit a folio must show technical competence, concept development, originality and creativity. Music audition applicants must display a technical competence on their principle instrument and a degree of expressive creativity in their performance (as required by the course qualification applying for). Applicants at interview must show commitment to study, an interest in the course, motivation to complete the course and their future career expectations.

Photography Studies College

PSC is a dual sector provider offering both the Higher Education Bachelor of Photography course with majors in commercial photography, photojournalism and art photography and the VET sector Advanced Diploma of Photography course.

Applicants to PSC are selected on the basis of meeting minimum tertiary entrance requirements attending an interview and presenting a folio that contains between 8 - 15 well presented final images. These should demonstrate the applicants’ aptitude for photography and potential.

At interview applicants will be given the opportunity to demonstrate their engagement with photography and showcase their skills, interest, strengths and personal motivation for study. Applicants should come to the interview prepared to discuss and answer questions about their folio, ideas, processes, inspirations and career aspirations.

Republica Education

General Principle of Admission Policy

Tractor applicants will be required to attend an interview and present a folio of work in person or over the phone if the applicant is located in a regional area or interstate.

Detail of Folio

The Folio presented should demonstrate the applicant’s creativity and art skills. Folios can include illustrations, drawings, sketches, paintings, video clips, animation, multimedia, web design, photography, visual communication and graphic design.

Detail of Interview

Students will need to demonstrate their passion and enthusiasm to complete the course applied for to a high standard. Areas covered at the interview include communication, personal motivation, educational history and long-term career aspirations and goals.

RMIT University

RMIT will admit students on the basis of satisfaction of their demonstrated capacity to succeed in their chosen course. In addition to general entrance requirements, applicants must also satisfy the relevant prerequisite studies and additional entry requirements for their course of interest.

Selection Requirements
In addition to the general entrance requirements, some courses may have selection requirements including (but not limited to):

- Form/Kit
- Interview
- Folio, folio presentation
- Course specific or other admissions test

The purpose is for an applicant to show that they have a good understanding of, and a strong desire to study the course they have applied for. If a course has selection requirements, detailed information will be available in the individual course entry in the VTAC Guide.

Detail of Folio/Preparation Requirements
Where applicants are required to submit a folio, generally the folio should comprise 15 to 30 pieces of original personal work. The folio could contain a variety of personal work in art, design or media which demonstrates the interests, creative thinking and conceptual, design and technical skills of the applicant. Examples of work may include drawings, paintings, graphic designs, photographs, digital images, models, sculpture, video, scripting, short stories and/or 2D and 3D flash animation. For design courses the folio presentation is an opportunity to present a folio of your work. Applicants may be asked to discuss their pieces of work, outlining why they chose a particular topic, what they were trying to achieve and the process undertaken to achieve the final product. In some cases selection staff may also ask about designers or areas of design that interest or inspire. Folio presentations are conducted in a friendly and supportive manner and are normally expected to take approximately 15 to 20 minutes. Applicants will be notified directly by RMIT as to whether or not they have been invited for a folio presentation. This notification will also include details of the folio presentation, and any further information.

Detail of Interview/Preparation Requirements
Interviews are part of the selection process for some courses. The interview process is an opportunity for applicants to demonstrate their understanding, ability and motivation for the course for which they are applying. During the interview, applicants present to a panel consisting of selection staff from the course to which they have applied. Applicants are asked questions about their work and interests in line with the selection criteria. Interviews are conducted in a friendly and supportive manner and are normally expected to take approximately 15 to 20 minutes.

Applicants will be notified directly by RMIT as to whether or not they have been invited for an interview. This notification will also include details of the interview and any further information.

The University of Melbourne has principles of selection and accompanying Academic Board Resolutions, which apply to individual undergraduate and graduate courses. These can be viewed at: www.futurestudents.unimelb.edu.au/admissions/entry-requirements. All courses, except Arts (Extended) and Science (Extended), Diploma in General Studies, Fine Arts (all specialisations), Music and Music (Chancellor’s Scholars Program), use the Australian Tertiary Admission Rank (ATAR) and a two-stage selection process and have agreed to the selection of a significant proportion of applicants from below the Clearly-in rank. Consideration below the Clearly-in rank will be given to applicants eligible for University of Melbourne special entry schemes (all courses) and applicants with relevant work experience (Agriculture and Urban Horticulture).

**Detail of folio/audition preparation:**
Selection into the University of Melbourne’s Fine Arts and Music courses is talent-based. Each specialisation within Fine Arts requires an audition/interview and additional extra requirements. The selection process for our Music courses includes an audition and a musicianship test. Full details of the selection requirements for our Fine Arts and Music courses can be found at: www.coursesearch.unimelb.edu.au

**Preparatory subjects for specific majors:**
Commerce applicants intending to major in actuarial studies or complete an engineering sequence are encouraged to complete Units 3 and 4 Specialist Mathematics. Commerce applicants intending to undertake an engineering sequence in electrical or mechanical systems are encouraged to complete Units 3 and 4 Physics.

Environments applicants intending to major in construction, environmental science, geomatics/spatial systems or property, or undertake an engineering major are encouraged to complete Units 3 and 4 Mathematical Methods.

Science applicants intending to major in animal health and disease (the shortest pathway to the Doctor of Veterinary Medicine) are encouraged to complete Units 3 and 4 Chemistry.
